RE: Disposal Method for Contaminated Soil and PPE
Subcontract Number 9904-03-05-07 (Transportation and Disposal Services)
Delivery Order 9904-03-05- 12th Street Landfill Site, Wilmington, Delaware

Dear Mr. Towle,

As indicated, Guardian has recommends that Elk Environmental Service's be awarded the above subcontract for the transportation and disposal of the contaminated soil and PPE at the 12th Street Landfill Site. The intended method of disposal is to transport the material to the disposal facility (Millservice, Inc. in Yukon, PA). Upon arrival the material will be treated with lime and phosphates to stabilize the metal lechates. Once it has been confirmed that the process was effective, the material will be placed in a residual waste landfill located at the same location.

If this method is acceptable please countersign this memo and return it to me so I may complete the subcontracting process.

Should you have any questions or require additional information, please contact me at (302) 834 -1000, extension 284.

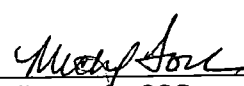

Very truly yours,

(b) (4)

Transportation & Disposal Coordinator

cc. Site file

The method described above is acceptable for the treatment of the contaminated soil and PPE from the 12th Street Landfill Site.

Mike Towle, OSC

Method Consent per H.20 (b)
